Volume 124 November 1982

CONTENTS

The effects of a strongly temperature-dependent viscosity on slow flow past a hot sphere. S. Morris *page* 1

Gravitational and zero-drag motion of a sphere of arbitrary size in an inclined channel at low Reynolds number. Peter Ganatos, Sheldon Weinbaum and Robert Pfeffer 27

Experiments on nonlinear instabilities and evolution of steep gravity-wave trains. Ming-Yang Su, Mark Bergin, Paul Marler and Richard Myrick 45

Three-dimensional deep-water waves. Part 1. Experimental measurement of skew and symmetric wave patterns. Ming-Yang Su 73

Calculation of steady three-dimensional deep-water waves. Daniel I. Meiron, Philip G. Saffman and Henry C. Yuen 109

Collision phenomena in free-convective flow over a sphere. S. N. Brown and C. J. Simpson 123

Acoustic streaming in swirling flow and the Ranque–Hilsch (vortex-tube) effect. M. Kurosaka 139

Mechanisms of inlet-vortex formation. F. De Siervi, H. C. Viguier, E. M. Greitzer and C. S. Tan 173

The hydrodynamic interaction of two spheres moving in an unbounded fluid at small but finite Reynolds number. Yukio Kaneda and Katsuya Ishii 209

Influence of hydrodynamics and diffusion upon the stability limits of laminar premixed flames. Pierre Pelce and Paul Clavin 219

Flames as gasdynamic discontinuities. M. Matalon and B. J. Matkowsky 239

Distortion of turbulence in flows with parallel streamlines. M. R. Maxey 261

Steep standing waves at a fluid interface. James W. Rottman 283

Oscillations of an unstable mixing layer impinging upon an edge. Samir Ziada and Donald Rockwell 307

Jets rising and falling under gravity. Jean-Marc Vanden-Broeck and Joseph B. Keller 335

Calculations of laminar viscous flow over a moving wavy surface. E. A. Caponi, B. Fornberg, D. D. Knight, J. W. McLean, P. G. Saffman and H. C. Yuen 347

The use of multiple wall probes to identify coherent flow patterns in the viscous wall region. J. H. A. Hogenes and Thomas J. Hanratty 363

On the layers produced by rapidly oscillating a vertical grid in a uniformly stratified fluid. S. A. Thorpe 391

A comparative assessment of spectral closures as applied to passive scalar diffusion. J. R. Herring, D. Schertzer, M. Lesieur, G. R. Newman, J. P. Chollet and M. Larcheveque 411

On Rossby waves modified by basic shear, and barotropic instability. P. G. Drazin, D. N. Beaumont and S. A. Coaker 439

The effect of the thermal prong–wire interaction on the response of a cold wire in gaseous flows (air, argon and helium). P. Paranthoen, C. Petit and J. C. Lecordier 457

Taylor–Görtler vortices in fully developed or boundary-layer flows: linear theory. P. Hall 475

Sedimentation in a dilute polydisperse system of interacting spheres. Part 2. Numerical results. G. K. Batchelor and C.-S. Wen 495

Reviews
Hydrodynamic Stability, by P. G. Drazin and W. H. Reid 529
